DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims **1-11, 16-23, 27-35, and 39-47**, drawn to a method, router, and computer readable medium used for selecting a switched virtual circuit for IP packet transmission according to services desired, classified in class 370, subclass 235 (flow control of data transmission through a network).
 - II. Claims **12-15, 24-26, 36-38, and 48-51**, drawn to a method, router, and computer readable medium used for receiving a set up request requesting the set up of a switched virtual circuit, classified in class 370, subclass 395.2 (Connection set-up/disconnect).

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as flow control of data transmission through a network whereas invention II has separate utility such as connection admission control. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2666

4. A telephone call was made to Narendra R. Thappeta (Reg. No. 41416) on 1/12/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
